

C1	Apply design, write and debug programs that accomplish specific goals, including controlling or simulating physical systems; solve problems <b>by decomposing them into smaller parts.</b>
C2	Apply sequence, selection, and repetition in programs; work with variables and various forms of input and output.
C3	Apply logical reasoning to explain how some simple algorithms work and to detect and correct errors in algorithms and programs.
C4	Apply understanding of computer networks including the internet; how they can provide multiple services, such as the world wide web; <b>opportunities they offer for communication and collaboration.</b>
C5	Apply the use of search technologies effectively, appreciate how results are selected and ranked. <b>Know how to be discerning in evaluating digital content.</b>
C6	Apply how to select, use and combine a variety of software (including internet services) on a range of digital devices to design and create a range of programs, systems and content that accomplish given goals, including collecting and presenting data and information. <b>Analysing and evaluating.</b>
C7	<b>Use technology safely, respectfully and responsibly; recognise acceptable/unacceptable behaviour; identify a range of ways to report concerns about content and contact.</b>
